---

## SKILLS

React	Problem Solving	C++	Time management
Node.js	Java	SQL	Leadership
MongoDB	Python	Responsive Design	Team Collaboration
Unit Testing	C		

---

## PROFESSIONAL EXPERIENCE

### Paypal

May 2023 - Aug 2023

#### Software Developer Intern

Created and constructed an internal PayPal application called Quizzy, which is a clone of Kahoot. The stack that is used consists of Node.js for the front end, Next.js for the back end, MongoDB, Express, socket.io for JWT authentication, and MongoDB. and contributed to unit testing Node.js applications.

## PROJECTS

### Quizzy

A real-time quiz app allows administrators to create quizzes using a provided form or pre-built questions. Unique features include automatic question upload and user-downloadable quizzes. Admins can reuse quizzes, and players enter using a pin code.

### Outpass Management System

The Outpass Management System streamlines the process of managing outpass requests for colleges. By providing a user-friendly online platform, it replaces traditional paperwork for teachers, staff, and administrators, enhancing efficiency. Particularly beneficial for the girls' hostel, the digitalized procedure eliminates the laborious manual process. Students can apply using their digital IDs, facilitating remote communication with the relevant personnel. The system not only expedites the outpass approval process but also simplifies tasks for staff members involved in authorization.
